

4SEASONS PERGOLAS

PERGOLA

Pergola is a versatile solution that will work not only in case of a single-family home as part of terraces or garden spaces, but also in commercial facilities, constituting a modern and practical element of roofing summer gardens in cafes or restaurants. Thanks to the possibility of using side shutters such as screen fabrics or glass sliding panels, the pergola can be used regardless of the prevailing weather conditions.

CONFIGURATION

SKYVI pergolas are available in various sizes and configurations.

Single free-standing pergola

Double free-standing pergola

One row multi-module free-standing pergola

Single wall mounted pergola

Double wall mounted pergola
